

Introducing **Puzzle Masters**

It's the **high energy, super fun, puzzle solving** challenge your students will love.

Head to head puzzling

High energy, active student incursion

Puzzle Masters will draw your cohort into a fun team challenge where nimble minds will win the day. With a touch of pressure, your students will have the opportunity to improve their team work, group problem solving, communication and social skills.

Overview:

Teams go head-to-head in a race for the most points gained by solving puzzles of varying difficulty on a customised tablet app. They'll be putting to practice their critical and creative thinking capabilities and their myriad of learning area skills through practical and physical problem solving.

Extend the experience by adding the Great Divide challenge for even more fun and learning. Students are tasked with building a bridge out of items purchased with points won through completing puzzles. Best bridge wins!

Skills to take back to the classroom:

- Uncover hidden strengths
- Practicing resilience
- Team work

Highlights:

- **Fun team work:** Competition and challenge will bring mini teams together to win the day.
- **Fast moving:** An easy to understand experience that will keep everyone engaged.
- **Learning through games:** Puzzles based on curriculum allow students to practice problem solving skills.

How it works

- We arrive, set up the experience and collateral around the designated area
- Introduction, search and find puzzles and challenges (60 minutes), debrief and links back to skills

Perfect for

- Team building, small or large groups, competitive teams, fun and different experience to add to a camp or incursion day

Practicals

Team Size: 4-7 pax

Capacity: 25+

Duration: 1.5 hours (+45 mins when adding Great Divide)

Location: We come to you

Space: Open space to brief participants and reasonable sized area to place puzzle stations

AV: Not needed

Why it works so well

- Students practice team work and social skills in a non-threatening, fun environment
- Puzzles and challenges based on general curriculum skills
- Experienced facilitator to direct learnings
- Dynamic experience that changes and challenges teams to adapt
- Integrated technology for each team
- Just the right amount of challenge to kickstart momentum without being frustrating

We have used the Directors of the Extraordinary with our staff and students alike. We have loved every single tailored session and have found them to be equally challenging and highly engaging. The fantastic communication leading up to the sessions is always appreciated as is their energy and professionalism.

Shannah Kennedy / Brisbane State High School, Deputy Principal
